

This is how dangerous cell phones are...

Statistically, your drivers are texting and driving, and that opens up your fleet to a lot of risk.

Texting And Driving Is

6 Times

More Likely To Cause A Crash Than Drunk Driving

Cell phone use was a factor in

14%

of all fatal crashes in the United States in 2017 (NHTSA).

Of all vehicles crashes in the US,

25%

involve the use of a cell phone (National Safety Council).

Of all drivers in the US,

60%

use cell phones while driving (Harris Poll).

Crashes in your fleet are so costly...

The average fleet has a

20%

crash rate [Network of Employers for Traffic Safety (NETS)].

Non-fatal crashes cost an average of

\$65,000

(CDC)

Fatal crashes cost an average of

\$670,000

(CDC)

It is hard to quantify

Lost Productivity

due to crash injuries, fixing vehicles, and dealing with the fallout.
