

Unlocking the future of digital mobility

SixSense® – your retrofit phone-as-a-key solution

Open the door to digital mobility. Our SixSense® digital access system is the ideal solution to bring your existing rental cars and fleet vehicles into a key-free and digital future.

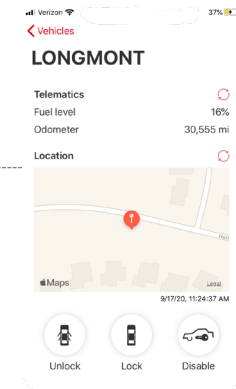

Our system is easily installed in about 10-15 minutes for an experienced installer, and can be transferred to a new vehicle just as quickly. Once installed, customers use the mobile app to lock and unlock the vehicle. Multiple layers of security retain better control over the vehicle; digital encryption of digital key, tamper prevention and the ability to revoke access help protect your asset.

1. Put Key Fob in Car Access Module

2. Install Car Access Module in Car

3. Lock/Unlock with App

Unlocking the future of digital mobility

SixSense® – your retrofit phone-as-a-key solution
