

PowerDMS[®]

For Law Enforcement

Protect your agency by reducing risk and limiting liability.

PowerDMS reduces the cost and complexity of policy management and training by storing, updating, disseminating, and tracking critical compliance content online.

Benefits of PowerDMS

- ✓ Attain and Improve Compliance
- ✓ Reduce Risk and Increase Accountability
- ✓ Save Time, Money and Headaches

Policy

PowerDMS is the secure, online location for the organization, management and distribution of your most important policy documents. Quickly see and understand the complete history of your documents and ensure your team only sees the most up-to-date versions.

Training

Develop fully-customized, online courses officers can take independently, at their own pace eliminating the cost of overtime and on-site classes.

Accreditation

Take the stress out of an audit and manage the accreditation process electronically, by attaching proofs of compliance to electronic industry standards saving you time, money and resources.

Standards Available in PowerDMS:

"If something should happen and we have an incident, we can show we've given the proper tools to the employee. We can immediately prove they were provided with written guidance, followed direction given, operated within industry standards and followed it up with training and testing."
