

RULES AND REGULATIONS FOR VEHICLE DISPLAYS

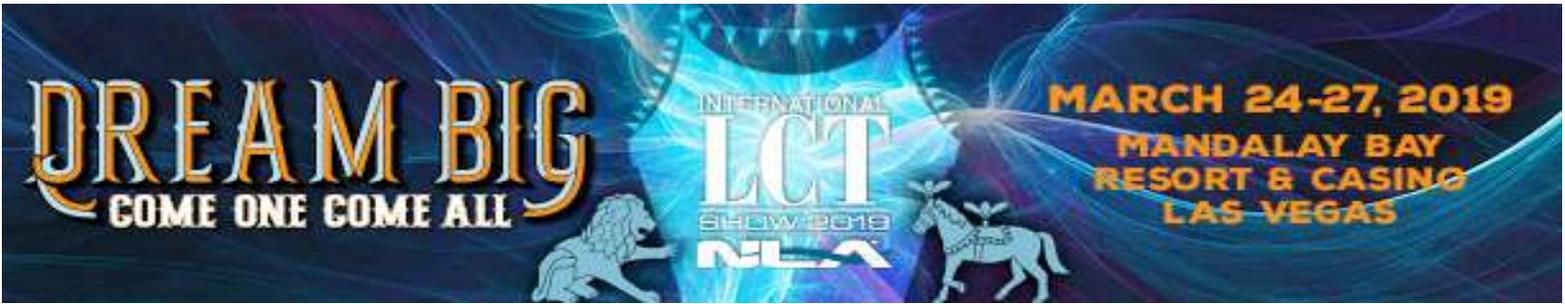

Here is a list of rules and regulations that apply to all exhibits that include vehicle displays. Please accurately measure your vehicle to ensure that your exhibit will adhere to these rules. If you need more space, contact Sara Eastwood-Richardson at (253) 983-0515.

SPACE BETWEEN VEHICLES

Exhibits with multiple vehicles must position the vehicles so there is enough clearance for pedestrians to easily walk through in case of an emergency. The fire marshal will make the determination onsite if you have allowed enough clearance so plan ahead and don't pack your space too tight; leave room (at least 3 feet) to make any adjustments deemed necessary by the fire marshal.

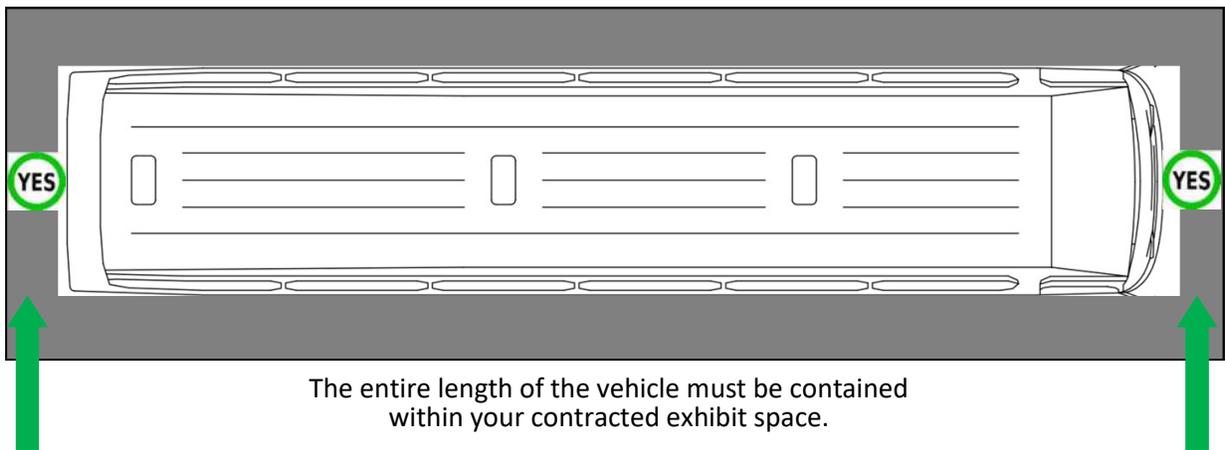

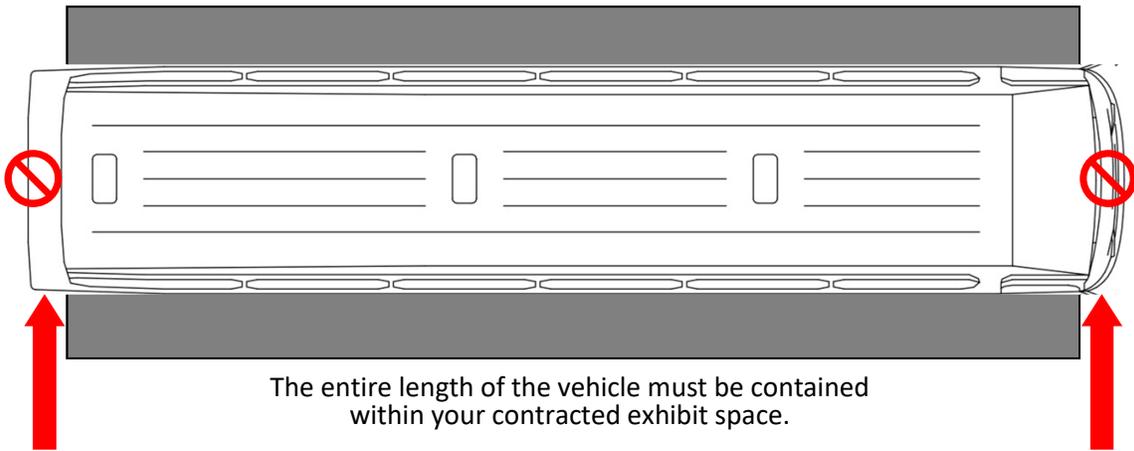

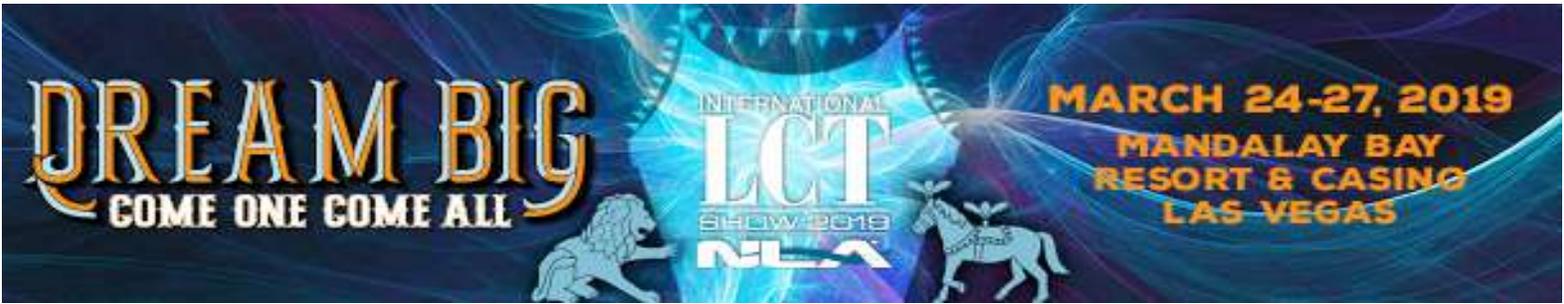

Leave enough space between vehicles for pedestrians to walk through in case of emergency.

BUMPERS AND GRILLS

You must take into account the full length of your vehicle including bumpers, grills and any modifications. The entire length of your vehicle must fit into your contacted exhibit space. No part of the vehicle may extend beyond the perimeter of your space.

DOORS

When fully extended, all vehicle doors must still be contained in your contracted exhibit space. Vehicle doors may not open beyond the perimeter of your space into the aisles or into the space of a neighboring booth. When planning your space, include fully extended doors in the width of your vehicle. Do not plan to position any vehicle on the border of your booth space if you will be opening the doors. When the doors are open the entire vehicle must be within the borders of your booth. You may position your vehicle on the border of your booth space if the doors are closed and locked for the duration of the show. If you share a border with another booth you must position your vehicle a minimum of 3ft from the border.

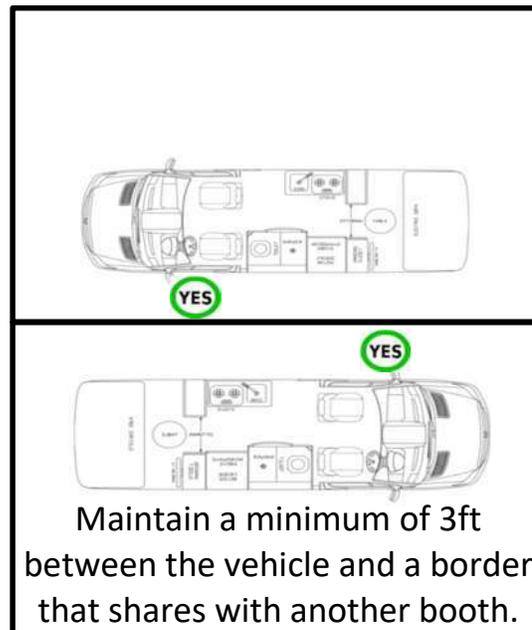

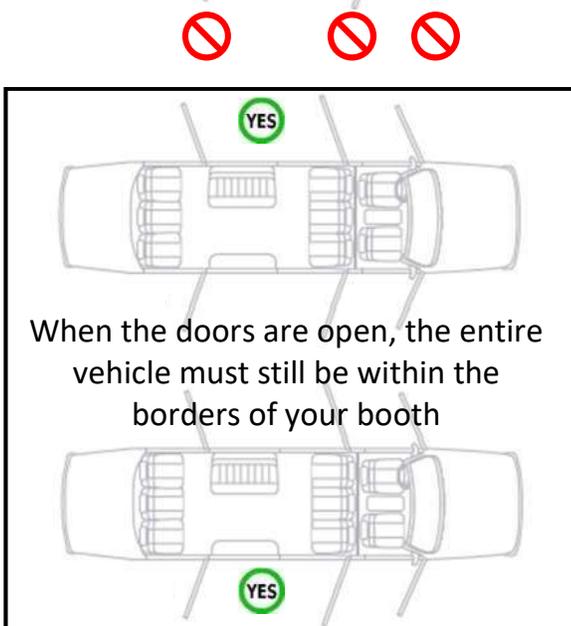

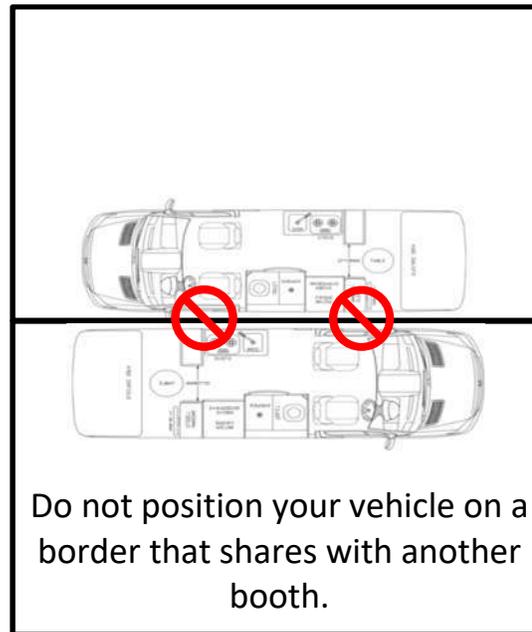

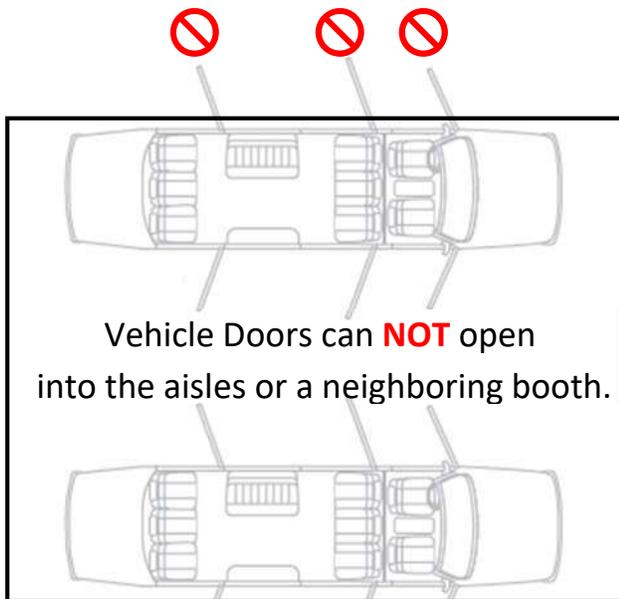

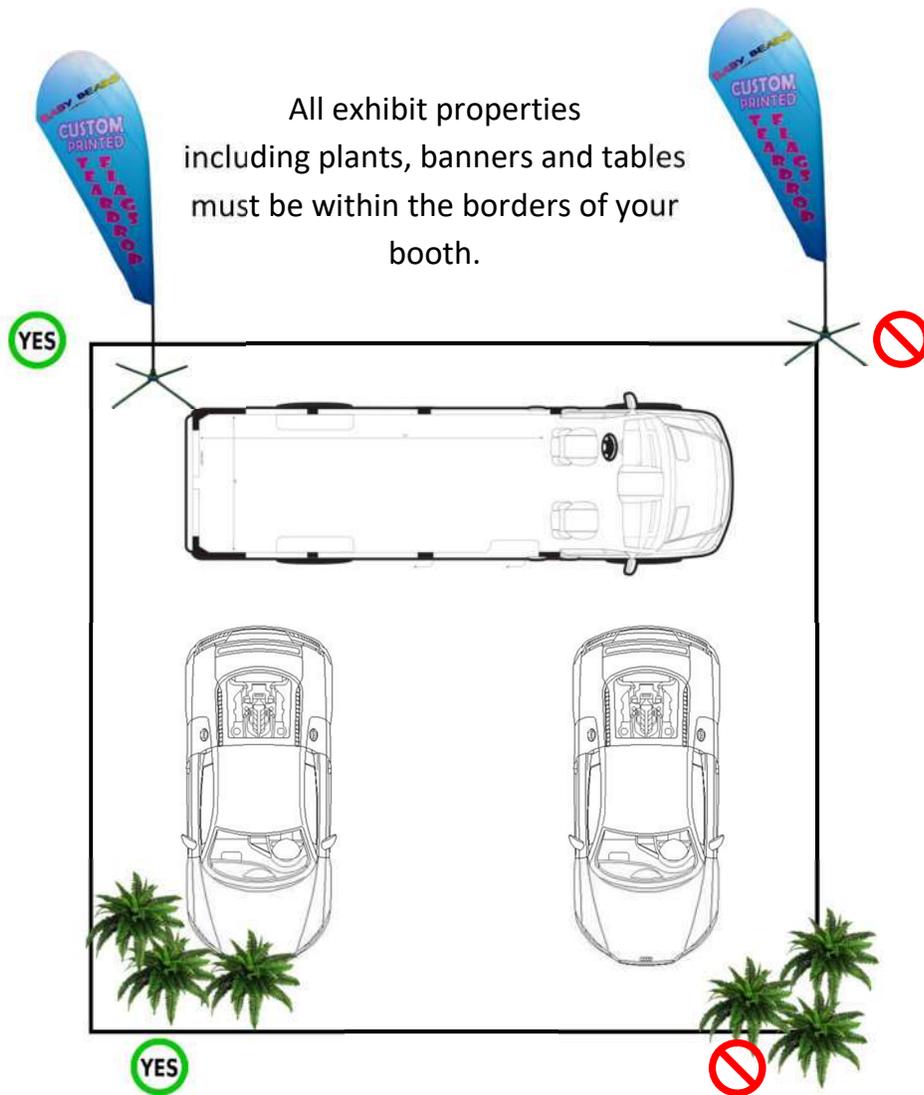

EXHIBIT PROPERTIES

All exhibit properties including wheel stands, banners, plants and tables must be placed within the borders of your contracted space. No exhibit property may encroach on the aisles, please plan accordingly.

Do not remove the tape marking your booth space. A representative from the general contractor will remove the tape or must give you approval to remove it.

BANNER HANGING

See page 14 for more information on banner hanging.

VEHICLE FIRE MARSHAL INSPECTION

Prior to driving your vehicle into the exhibit hall your fuel-levels will be verified against the requirements below.

Make sure to get this information into the hands of your vehicle supplier. Once the vehicle arrives onsite it is time consuming and very difficult to drive off or siphon excess fuel.

FUEL TANKS ARE TO BE NO MORE THAN 1/4 FULL OR 5 GALLONS, WHICHEVER IS LESS

Once your vehicle is inside the exhibit hall, please verify against this checklist in preparation for fire marshal inspection.

If you plan to leave your vehicle unattended you must leave the hood open and the driver door unlocked so the fire marshal can access your vehicle. Also, keep your keys at the booth.

ALL vehicles must pass inspection in order for the exhibit hall to open, so don't be the one that holds up the opening!

Motorized Vehicle Information & Inspection Checklist:

- **Fuel in the tank shall not exceed 1/4 of the tank capacity or 5 gallons, whichever is less.**
- At least one battery cable shall be removed from the battery used to start the vehicle engine and the disconnected battery cable shall be taped. Batteries used to power auxiliary equipment shall be permitted to be kept in service.
- Fuel tank openings shall be sealed to prevent the escape of vapors.
- Propane tanks to be removed.
- Visqueen or other protective covering approved by the Mandalay Bay Convention Center placed underneath vehicle.
- **A minimum 42-inch wide access aisle or clear space shall be maintained around all sides of the displayed vehicle. Where multiple vehicles are displayed, a minimum 42" aisle shall be provided between vehicles.**
- Vehicles shall not exhibit any leaks of fluids.
- Ignition keys are to be removed from vehicle and readily available at all times.
- Hood (or access to battery compartment) to be accessible and the driver door unlocked.
- Vehicles shall not obstruct the clear width required for any portion of the means of egress.
- Vehicles shall not be fueled or refueled within the building.
- Exhibitors are not permitted to re-connect the battery and turn on the engine at any time before vehicle move-out. Displayed vehicle may only be moved during exhibit hours as allowed by the permit conditions established during the plan review.
- There is a mandatory MOTORIZED UNIT/VEHICLE SPOTTING FEE per vehicle. It must be paid and arranged through Shepard Exposition Services
